REPORT OF THE FOREST FIRE WARDEN

Crises like the present test the quality and sincerity of everyone's patriotism and citizenship. The times make such unavoidable demands for universal cooperation in the many lines of essential regular and emergency public endeavor that the response given may well be assumed to be the real measure of one's love of country and his appreciation of the opportunities it offers. Ranking high in the list of public endeavor is the protection of our forests from fire. It calls for full and generous cooperation by each of us. Fire statistics indicate that better than 98 per cent of all fires in New Hampshire are man-caused. If human carelessness could be eliminated from the problem, the number of fires would drop to a mere minimum of less than two per cent of present figures and fire costs and losses would reduce in proportion. While this goal will not be achieved because of the perversity of human nature, the record can be vastly improved through individual discipline, alertness and cooperation.

Discipline calls for personal restraint from following unrestricted natural impulses to do as one pleases with regard to fire; alertness in cautioning others against imprudent and illegal burning and in promptly reporting fires to the local forest fire warden; cooperation in complying with laws, rules, and regulations governing the kindling and care of fires, smoking, safety of mechanical units using fire in and near woodlands and assisting the local warden in extinguishing such fires as may occur.

The possibilities of disastrous and expensive woods fires are constantly becoming more real. The hurricane felled an estimated one and one-half billion board feet of standing timber, much of which was never cleaned up. To this hazard has been and is being added extensive areas of slash from additional hundreds of millions cut to produce vitally needed wood for the war effort. With the stage so set greater caution is increasingly necessary.

It will pay substantial dividends in unburned forest areas and the saving of unnecessary fire expense.

The year 1943 was an extremely fortunate one because of favorable weather conditions. Many towns had no fires, some had minor fires while a few had expensive ones. The public controls the answer to the 1944 and future years' fire records. If the public is careful and cooperative the record will be good.

Your town warden is, perhaps, more perplexed and anxious during these war years than ever before because of increased forest fire hazards and diminishing supplies of available man-power. He looks directly to you to aid him. Will you? You can aid him most effectively by always securing the required permit before attempting to burn and by complying fully with permit requirements; by being patient when he advises of departmental restrictions on permit burning or that he deems it unsafe to burn; and by giving him the needed assistance in extinguishing fires when he needs your help. To do so is to meet one real test of citizenship.

N. H. Department of Forestry and Recreation,
P. K. BROWN, Fire Warden.

THE DARTMOUTH-LAKE SUNAPEE REGION

The Legislature of 1937 authorized the establishment of six Regions, each comprising a group of towns suggested by the State Planning & Development Commission. The Dartmouth-Lake Sunapee Region comprises this town and 37 others in this section of the state. The Region is incorporated as a non-profit corporation and its affairs are supervised by a group of officers chosen annually. The Region employs a full time secretary who is **paid by the state** (not by the towns). Thus your Region is a set-up established by law and the matter of whether or not it has sufficient financial support

to render real service to your community rests with the voters of the towns. During its existence the Dartmouth-Lake Sunapee Region can point to the following accomplishments. Through the publicity it has issued it has brought visitors to every town, some have established summer homes and others have become permanent residents. It has been instrumental in bringing industries to several towns. It has inaugurated plans that have saved historic landmarks. It has sponsored paying summer attractions. It has been active in bringing about a survey of our mineral resources that has resulted in revenue to many towns and has conducted studies of new agricultural products.

By an appropriation not exceeding 1/100 of 1% of the assessed valuation the Region now asks the support of your town in continuing the program that has brought about the aforementioned results and to institute the following three projects which if carried through must result in added income to each of the 38 towns of the Region: (1) A research of the possibilities of establishing industries that will use as raw materials, minerals within our area and make a study of the feasibility of the production, processing and sale of several agricultural products that in the past have received but little attention. (2) To cooperate with each of the towns in preparing descriptive pamphlets showing the attractions, natural advantages and resources of the community with the idea of eventually incorporating such material into a book descriptive of the whole Region. (3) To establish a system of Recreation Trails following back highways and little used roads leading to scenic areas and desirable locations in each of the 38 towns in the Region. As it is not deemed proper to devote more space in your Town Report to this subject, details have been omitted, however, letters of inquiry regarding any matter here mentioned will be welcome and given careful reply. Address, Dartmouth-Lake Sunapee Region, New London, N. H.
